Simply Classic Style

Create a simply stunning look inside and outside your home with Classic Aluminium Plantation Shutters.

Add security to windows and doors or divide an area to create a multi-purpose living space. Regardless of the application Classic Aluminium Plantation Shutters are a flexible, hard wearing and quality solution to suit all most every situation.

Why choose Classic Aluminium Plantation Shutters?

Most people believe that Aluminium Plantation Shutters are good for outdoor situations. However, more and more of our clients see the inherent benefits, versatility and stylish look which Classic Aluminium Plantation Shutters bring to all areas of your home.

Add security to windows and doors or divide an area to create a multi-purpose living space, regardless of the application Classic Aluminium Plantation Shutters are a flexible, hard wearing and quality solution.

Classic Aluminium Plantation Shutters are 100% Australian made. The extensive range of fitting options including; Hinged, Bi-folding and sliding styles, create a versatile product to provide a solution to suit any purpose.

Benefits of Classic Aluminium Plantation Shutters

Apart from the obvious benefits of durability and optional security, Classic Aluminium Plantation Shutters offer so much more...

SPECIFICATIONS

- Panel Widths of up to 1200mm
- Aerofoil 90mm blades
- T6 Grade commercial strength aluminium
- 50% thicker extruded profiles
- Triple lock combination
- Minimum moving parts
- Stainless steel fastenings

DURABILITY

Classic Aluminium Plantation Shutters do not dent nor over heat. Made from T6 Grade Aluminium - hot quenched, a similar process to hardened steel, making the aluminium the best commercially available.

THERMAL PROTECTION

The extruded aluminium profiles used to manufacture our panels have air spaces that provide excellent thermal protection from both heat and cold, working in a similar way to double glazing.

STRENGTH, STABILITY & SECURITY

A central core runs through the blades combined with a triple locking system offering a high degree of strength, stability and security.

Spring loaded end caps are the only moving parts. All corners are screwed rather than glued ensuring a longer life span.

2 control bars help to block light leakage and gives greater stability when turning blades.

PROTECTING YOUR INVESTMENT

- 5 year warranty for bowing and defects.
- 10 year powder coating warranty on defects.
